By 1982, the game of golf was played in US high schools, although it was not an organized sport. To learn the game of golf, golfers would learn by observing adults and playing together with friends, the children of their families and others. This method is known as a "closest to the hole" learning method. By the time a child entered high school, it was customary to develop and play a game with friends that would require the ability to keep score. If they wanted to play the game, they had to learn how to do so. If they wanted to play the game, they had to learn how to do so. The story of golf developed from the earliest tribes of man, but it was the Romans who first established a written form of the sport. Rules were written and the game became formalized. The first recorded rules of golf date back to 1555. The Rules of Golf (RG) were established in 1844. The American Congress on Guidance and Counseling in a United States Public School, a government backed agency, published the Elementary and Secondary School Grades 1-12 Guidance Manual in 1955 and updated it in 1965, 1981 and 1988. In 1988, the manual went through significant revisions and renamed it the Manual for Guidance and Counseling in a United States Public School. In 1995, it was renamed again, this time to The Guiding Stars™ (GS). The Guiding Stars has also been issued in an electronic format since its development in 1993. The Guiding Stars was developed to assist students in a US public school curriculum. It offers guidance on teaching and learning standards to help teachers and administrators identify and develop appropriate measures for individual students, improve curricular relationships and opportunities for collaboration, and make the right choices. Since it was published as an electronic version, it is available in classrooms, handhelds, and other devices. It was developed to assist students in a US public school curriculum.
