Save ScreenMeet Pro Screenshots ScreenMeet video See ScreenMeet in action Show your creativity See ScreenMeet in action Demo of ScreenMeet Video chat See ScreenMeet in action Demo of ScreenMeet Screenshot Show your creativity See ScreenMeet in action Demo of ScreenMeet Screenshot Download ScreenMeet Download ScreenMeet for Windows Download ScreenMeet Download ScreenMeet for macOS Download ScreenMeet Download ScreenMeet for Android Download ScreenMeet Download ScreenMeet for iOS Download ScreenMeet What's New v2.0: Resolved most issues discovered while testing ScreenMeet Added some new features that will come with ScreenMeet Pro version Added some new designs for ScreenMeet for different platforms Refined some visual issues Fixed some bugs ScreenMeet Screenshots We had some issues with the screenshot of the active windows after activating it. I spent some time trying to figure out how to fix this issue. I found out that the application has a bug that it doesn't close your current browser window when activating the screenshot. So to fix this issue, you have to select "Clear all the open windows" and then select "Save screenshot to clipboard". What's New In?

ScreenMeet is a utility designed to make video conferences simpler by providing you the means to share a certain window or your entire desktop screen on multiple platforms. Simple, non-distracting and modern UI The utility comes with a sleek and stylish interface that includes only a few options, namely sharing one of your active windows or your entire desktop screen. Once it starts streaming, you can access a few extra options, such as switching to full or mini mode as well as ending and pausing the sharing. After you create a private room for your streaming, you can invite participants by either sending them an email with the URL or copying the link and sharing it via an IM client. Since the idea behind this utility is to simplify virtual conferencing, the app enables you to copy the URL to clipboard for faster sharing. Should include a feature that allows you to screenshot First off, it is necessary to underline that the quality of the streaming depends on the speed of your Internet. In addition, you should know that when maximizing the window, there is a chance that the image is displayed in a loop and that it may take some time to get a better quality. While it does a satisfactory job at streaming, the application could use a function that allows you and the other attendees to take screenshots. This option could come in handy when you stumble across a new situation and would like to get more details about it from an expert. Moreover, it would be nice if the utility also enables you to share files along with the streaming. 1. Issue: To start this test, you need to have Windows 10. 2. Steps: Close all windows except for Spotify. (you can do this by pressing CTRL + ESC and then ALT + CTRL + ESC) 3. Activate ScreenMeet: Open your App & you should be ready to start the test. 4. Recording: In a few seconds you should be able to see the quality indicator in the screen, it should be green or yellow (good or normal). 5. Attention: When you are streaming your window the indicator could be yellow but it's not that bad so be patient and you should be fine. 6. Recording: While you are streaming your window, you should be able to hear the audio but, you cannot control the audio. 7. Conclusion: While it can be a great idea to be able to share your desktop screen (For example by using ScreenMeet), there are still a few issues. Screenshots : 8. Part 2 1. Issue: To start this test, you need to have Windows 10. 2. Steps: Close all windows except for Spotify. (you can do this by pressing CTRL + ESC and then ALT + CTRL + ESC) 3. Activate ScreenMeet: Open your App & you should be ready to start the test. 4
