## AutoCAD Product Key Full Free Download

Versions AutoCAD software versions are numbered to reflect the version number of AutoCAD and the revision number of the CAD data or component (if any) that was used in its creation. Revisions to AutoCAD are grouped into major and minor releases. In AutoCAD 2017, major releases are numbered as the CAD data they contain was previously released. Prior to 2017, AutoCAD was released in two to three different editions (i.e., major and minor releases) each year, with the exception of minor releases being released every other year. For example, AutoCAD 2018 was released in June 2017, but AutoCAD 2019 was released in December 2018. Lifecycle Original versions The first AutoCAD was released in 1985 and can be viewed in detail in. AutoCAD 2 AutoCAD 2 (released June 8, 1986) was the second major release of AutoCAD (released in July 1985 as AutoLISP). It added the ability to generate three-dimensional (3D) model space drawings, component families, wireframe mode, and new capabilities for creating 2D drawings. AutoCAD 2 was also the first release to be commercially available for the Apple Macintosh personal computer. The first Macintosh version of AutoCAD, released in September 1986, was a completely rewritten, pre-release version of AutoCAD 2 for the Macintosh. In contrast to the previous version, which ran only on IBM-compatible computers, the new Macintosh version was both compatible and cross-platform. AutoCAD for Macintosh is also available to run on the Windows, OS/2, and Linux operating systems. AutoCAD 3 AutoCAD 3 (released November 15, 1987) added several new features, including parametric 3D modeling, object databases, a report writer, windows, and commands for advanced data communication. AutoCAD 3 also saw a transition in its development from the C++ programming language to the AutoLISP programming language. AutoCAD 3 was also the first release of AutoCAD to use the 32-bit Carbon API. This required that a new operating system, MacOS 8, be installed on the user's computer. AutoCAD 3 also introduced the first two editions of what would become the AutoLISP scripting language, including the main languages, AutoLISP 1 and AutoLISP 2. The first language was for

Application execution AutoCAD also has a scripting language that enables creation of script programs that can be run either manually, or at a scheduled or timed interval. Scripting is supported by Visual LISP, and language files can be created in a text editor for easy editing. Scripting is supported by Visual LISP, a language environment available for use with AutoCAD 2000, 2002, 2003, 2005, 2006, 2007, and 2012. External links ca3fb1094
