Innovative application to manage a small retail store. Its intuitive graphic user interface and friendly menus help you create product entries and categories by yourself. It is fully integrated with a Point of Sales module that has a built-in 'Buy Now' function. The application can be used to manage a small number of categories and products, track inventory and sales with e-reports. The application also allows you to integrate the inventory of vendors and increase their stock by issuing sales vouchers. Moreover, you can generate customized reports to keep track of the products that are due to expire, the ones that are low on stock or the ones that are not in stock. The application also allows you to view the activity of the vendors, which is useful for making sure no money is lost.
